EXPLORE THE FUTURE OF TOURISM!

SUMMER SCHOOL ORGANIZED BY SZÉCHENYI ISTVÁN UNIVERSITY IN GYŐR

Between July 4–14, 2025, the #TASA network's 2nd Summer School will be held in Győr under the title "The future of tourism – Digital tools and technological solutions". The Faculty of Economics of Széchenyi István University will host students from partner universities as well as all those, who are interested in the summer school.

I would like to warmly invite everyone to our event, where distinguished professionals, university lecturers, and prominent representatives from the tourism industry and digital marketing will share their knowledge and experiences on the subject. The program will include professional presentations, workshops, case study competitions, field trips and leisure activities too.

The event offers an excellent opportunity for participants to expand their international networks and make valuable connections.

The organizers, lecturers, and our students are excited to welcome participants to the wonderful city of Győr, where we offer unforgettable programs and learning opportunities for all interested attendees.

I hope to welcome many students from our partner universities to our city and Széchenyi István University!

See you in July 2025! Be part of an unforgettable experience!

Best regards,

Dr. Éva Happ, associate professor
CEEPUS #TASA network coordinator

MISSION

DEEPENING KNOWLEDGE

Dive into the world of digital transformation in tourism. Gain in-depth insights into how digital tools and technologies are reshaping the tourism industry and explore their real world impact in a fast changing environment, through plenary sessions and consultations.

GAINING EXPERIENCE

Gain hands-on experience by applying your knowledge to real-world projects and solving practical problems. Learn from experts and university lecturers. Participate in professional lectures and workshops where you'll master the use of digital tools and techniques.

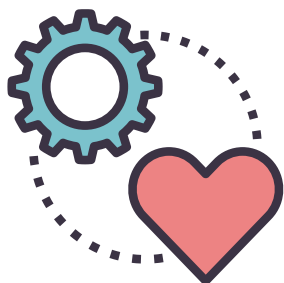

INNOVATIVE PROBLEM SOLVING

Handle real-world challenges with a live case study from AquaWorld Budapest. Collaborate with your peers, use cutting-edge digital tools, and develop creative, forward-thinking solutions to problems in present and future tourism.

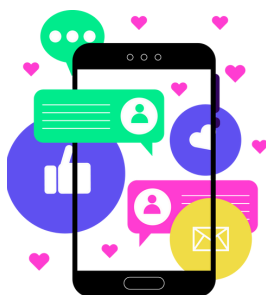

FIELD TRIPS AND EXCURSIONS

Engage in practical learning through field work and excursions. Visit key locations and world heritages. Immerse yourself in the local culture and history while expanding your knowledge of the sector.

HARD AND SOFT SKILLS DEVELOPMENT

Enhance both your technical and interpersonal skills. Participate in workshops, presentations, and team-building activities that will improve your communication and collaboration abilities. Throughout the course, special focus will be placed on developing technical expertise and communication.

NETWORKING AND CREATING MEMORIES

Join a community of like-minded individuals passionate about digitalization, tourism and self-development. Strengthen your global network, share experiences and make unforgettable memories.

ABOUT SUMMER SCHOOL

July 4th - 14th, 2025

**Győr, Hungary
Faculty of Economics,
Széchenyi István University**

**The future of tourism - Digital tools
and technological solutions**

Join us from July 4th to July 14th, 2025, and earn **5 ECTS CREDITS** for the interdisciplinary summer school "The future of tourism - Digital tools and technological solutions". This pioneering program, hosted by the Faculty of Economics at the Széchenyi István University of Győr, unites 32 partners within the CEEPUS #TASA network.

Our mission is to showcase the emergence and impact of digitalization, as well as explore the application possibilities of digital tools and methods in the tourism sector.

During the summer school, students work in teams on a real-life case study where they identify a specific problem and propose solutions using digital tools, methods, and technologies. The development of the case study requires collaborative work from the students, which is why we provide several individual and mentor-guided preparation sessions to help them find the best solutions. The key methodology is project-based learning, where participants work on real-world problems provided by the industry partner.

The summer school program is complemented by afternoon leisure activities, professional excursions, and field trips, which is also a great opportunity to build relationships among themselves.

Deadline: 10.05.2025.

ABOUT #TASA network

The program titled "The Future of Tourism – Digital Tools and Technological Solutions" involves all 32 members of the TASA network. The goal of the summer school is to provide participating students with deeper insights into the opportunities of digitalization in the field of tourism.

Within the TASA network, our focus is to present the appearance and impact of digitalization, as well as the potential applications of digital tools and methods in the field of tourism.

Our partnership is built around our commitment to key themes shaping the future:

- Artificial Intelligence and its role in the hotel industry
- Digitalization in tourist experiences
- Project management
- Online marketing solutions
- Case studies in tourism
- Effective communication and presentation skills
- Problem solving, teamwork, creativity

ABOUT THE UNIVERSITY

SZÉCHENYI ISTVÁN UNIVERSITY OF GYŐR

Located in the heart of this picturesque city of Győr, Széchenyi István University shines as a center of academic excellence, forward-thinking education and innovation. The university is known as one of the proud members of the top 600 young universities in the world.

As the honored host of this year's summer school, we invite you to experience our mutual effort to support innovation, lifelong learning, and personal growth in a welcoming and encouraging environment.

CAREER-ORIENTED EDUCATION

The university combines academic knowledge with practical experience through training programs, career counseling, and workshops that help students develop essential skills, making sure that graduates are ready for their future careers.

INDUSTRY COLLABORATION AND PARTNERSHIPS

The university works closely with a wide range of companies, organizations, and industry leaders, creating valuable opportunities for students to gain hands-on experience.

SKILLS DEVELOPMENT AND PROJECT-BASED LEARNING

The university has launched an educational reform to help students gain practical knowledge that aligns with labor market needs. The reform focuses on updating teaching methods, assessing competencies, developing skills, and integrating project-based learning into the curriculum.

CENTRE OF INTERNATIONAL PROGRAMMES

The university continually strives to widen the scope of its international activities. It supports student and faculty exchanges, international internships, and cooperation with universities worldwide, helping students gain valuable global experience.

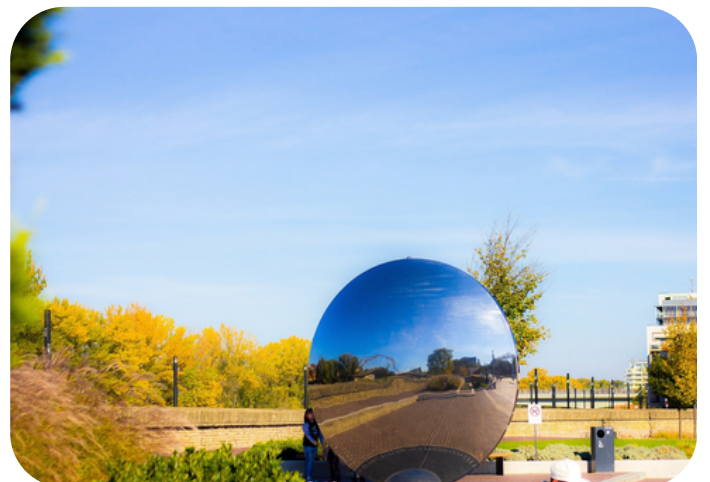

GYŐR, THE CITY OF WATERS

Győr is located in the north-western part of Hungary, close to the Slovakian and the Austrian borders. The city is situated on one of the important roads of Central Europe, halfway between Budapest and Vienna. The area has been inhabited since ancient times.

Győr has an enchanting centre and is rich in beautiful Baroque buildings. The historic heart of the town is Káptalan Hill, located at the meeting point of the Danube, Rába, and Rábca rivers. Today, Győr is one of the most important administrative and cultural centres of Hungary. It is also a vibrant university city and a favored destination for tourists.

As the host city for the summer school, Győr provides a perfect blend of academic opportunities and rich cultural heritages. With its stunning architecture, vibrant city life, and welcoming atmosphere, participants will experience a dynamic environment that encourages both learning and exploration, offering a unique mix of history, culture, and modernity.
